Portfolio: <https://lipesoft.github.io/portifolio/>

## PROFESSIONAL SUMMARY

Software Engineering student with hands-on experience as a Software Development Intern, supporting real-world software systems and contributing to technical solutions in production environments.

Background includes backend fundamentals using Python, relational databases with SQL, and system support across different operating systems. Experience also includes UI/UX and system design projects developed using Figma, strengthening problem-solving, user-centered thinking, and technical communication.

Currently seeking a **remote internship opportunity (Brazil or international)** in **Software Development or Database-related roles**, with a strong interest in backend systems and data-driven applications.

## PROFESSIONAL EXPERIENCE

### Software Development Intern

Ing Mídia Soluções Digitais - Salvador, Brazil

May 2024 – Present

- Provided technical support and troubleshooting for internal and client-facing software systems.
- Assisted in the development and customization of system templates using different programming languages.
- Supported system operations across Windows, Linux, and Android environments.
- Collaborated with technical teams by providing technical insights to improve software reliability and support new business initiatives.
- Gained hands-on experience with programming logic, system monitoring, and user support in production environments.

### Administrative Assistant

Manancial Extintores — Salvador, Brazil

Feb 2021 – Jul 2022

- Supported administrative operations, document handling, and internal organization.
- Assisted with equipment maintenance and resolution of technical issues reported by clients.
- Developed customer-focused problem-solving skills and attention to detail.

## EDUCATION

### Bachelor's Degree in Software Engineering

Universidade Católica do Salvador  
2024 – 2027

Relevant coursework: JavaScript, User Experience (UX), Software Development Fundamentals.

### Bachelor's Degree in Computer Engineering (Incomplete)

UNIJORGE (Universidade Jorge Amado)  
2021 – 2023

Focus on computing fundamentals, programming logic, and engineering principles.

## TECHNICAL PROJECTS

### Habit Tracking System (Python & SQL)

- Developed a backend application using Python and SQLite to manage users, habits, and daily progress records.
- Designed and implemented a relational database schema with foreign key relationships.
- Performed CRUD operations and SQL queries to retrieve and manage habit tracking data.
- Built a command-line interface to integrate backend logic and database operations.
- Versioned the project using Git and GitHub.

## UI/UX AND SYSTEM DESIGN PROJECTS

### DreamMind – Habit Tracking App (UI/UX Project)

- Designed user flows, wireframes, and high-fidelity prototypes using Figma.
- Focused on usability, accessibility, and user-centered design principles.

### ManagementCorp – Business Consulting Platform (UI/UX Project)

- Designed interfaces and workflows for systems focused on internal process optimization.
- Translated business requirements into structured digital solutions.

### TJBA Engenharia – Contract Management Platform (UI/UX Project)

- Designed web platform interfaces for monitoring and managing construction contracts.
- Applied system design and UX principles to real-world operational processes.

# SKILLS

## Programming & Development

- Python
- JavaScript
- HTML
- CSS

## Databases

- SQL
- Relational Databases
- Database Modeling Fundamentals

## Tools & Technologies

- Git
- SQLite
- Power BI
- Figma
- Microsoft Office
- Excel (Intermediate)

## Concepts

- Backend Fundamentals
- Programming Logic
- Software Support
- Help Desk
- User Experience (UX)

## Languages

- Portuguese — Native
- English — Basic / Intermediate (in progress)
